

## Color to a Hand Drawn Sketch Tutorial

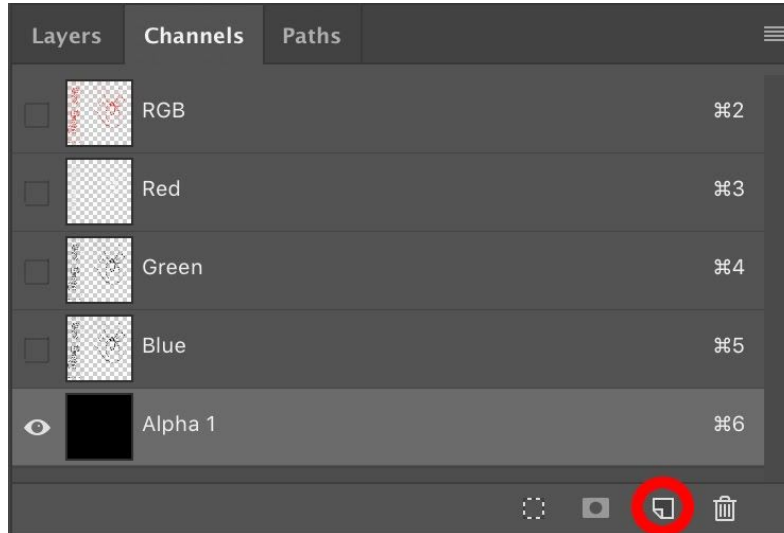

Use the Channels panel to isolate your hand drawn sketch and digitally enhance.

1. File > Open one of your scanned sketches
2. Increase contrast with Layer > New Adjustment Layer > Levels
  - a. OK
  - b. Move the white triangle left
  - c. Move the black triangle right

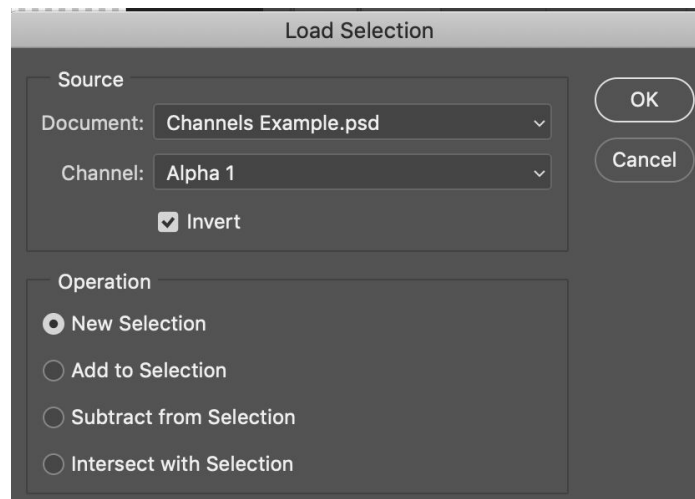

3. Layer > Flatten Image

4. Select all (Command and A), then copy (Command and C)
5. In your Channels Panel (next to your Layers Panel) or in Window > Channel
  - a. Create a New Channel
  - b. This channel will be named Alpha 1

6. With Alpha 1 active, paste your selection (Command and V)
7. In your Layers Panel, Layer > New > Layer
  - a. Name this layer Line
8. Select > Load Selection
  - a. Source Channel - Alpha 1
  - b. New Selection
  - c. Invert

9. Remove visibility of your Background Layer
  - a. Edit > Fill to fill your lines with any color
10. Add new colors on new layers
